Experience

ACEDEMAND IT Consulting Services - Google Cloud Premier Partner

Istanbul

Cloud Engineer

March 2024 - Present(Hybrid)

- I'm honing my skills in Hybrid Cloud and Multi-Cluster Kubernetes, building scalable cloud architectures. I provide DevOps-Cloud and Google Cloud consultancy, optimizing infrastructures for both domestic and international projects.
- I'm skilled in automating infrastructure with Terraform and applying IaC practices. I'm also proficient in Kubernetes, Istio, Anthos Service Mesh, and managing APIs with Apigee.
- I focus on logging, monitoring, and network security, ensuring system integrity and implementing Cloud Security best practices. I also streamline CI/CD pipelines to accelerate software development and deployment. I'm always learning and applying CNCF tools to stay updated with cloud-native tech.

Zip Turkey

Istanbul

DevOps Engineer

May 2023 - March 2024(Hybrid)

- I'm honing my skills in DevOps & infrastructure, focusing on Kubernetes administration, Grafana, Prometheus, Zabbix, Ansible, ArgoCD, Graylog, Elasticstack, GitLab, HashiCorp Vault, OneSpan, Nexus, Longhorn, and Ceph.
- I play a key role in DevSecOps, actively contributing to container and application security. I collaborate with PrismaCloud to strengthen security measures across our infrastructure, ensuring the safety of both our applications and containerized environments.

Formica

Istanbul

DevOps Intern

August 2022- October 2022(Hybrid)

- I've improved my skills in areas like Docker, Kubernetes, Helm, Ansible, Heroku, RabbitMQ, Apache Kafka, Redis, Grafana, Prometheus, Traefik, MongoDB, and Go. I've also gained experience with CI/CD processes and learned how Elasticsearch works.
